

MANIFEST OF METATEISM

METATEISMO

We want to sing the “divine essence” of Man, by illuminating his conscience with his intuition. Our tools are the Arts, our strategy is inspiration and our energy is love for the spiritual that is within us.

The link between the “above” and the “below”, the alchemic transformation, the “Origin” will be the Alfa and the Omega.

Art, since the beginning of Time, has always been the link (religio) with the Sacred. The nihilistic parable is over. Art from today is living again.

We exalt the eternal movement of the moment, the restless creative transformation of the “Beginning”, the immortal Journey towards tomorrow that is already here.

We are evolutionary against any blind form of revolution and its consequence - counterrevolution. We want to free Man from the crystallization of the idol, from the mechanism of superficiality and the enchantment of fear.

Spiritual philosophies and traditions are only different languages with which we describe the Spirit, which is both human and divine.

Beauty is eternal, Art is dynamic; whoever tries to freeze it is merely incapable of proceeding at its speed. Art is the eternal human journey aimed at revealing the divine.

Let the countable restart its dialogue with the Spirit. The Evolution of Man can only happen with the harmony of the opposites: Lux in Tenebris.

We glorify the Origin. To be “original” not as a distinction from the others but as a manifestation of the uniqueness of our individual essence: our true “origin”.

We want to transform Man into a temple, a museum, a library, the only academy, the only industry, the only government, a measure of the immensurable, infinite universes and worlds.
